

Turning Waste into Sustainable Opportunities

Agriview redefines the future of packaging. Turning agricultural waste into biodegradable and germinable solutions.

PITCH DECK

Problem

8M tons of plastic enter oceans yearly; microplastics in food, water, and human bodies.

Mozambique's Reality

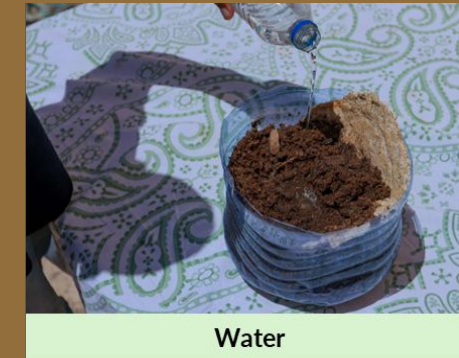

Abundant agricultural waste (maize husks) often burned, creating pollution.

Opportunity

Transform agricultural waste into biodegradable, germinable tableware.

Need: Affordable, eco-friendly alternatives that work in real life.

Event producers and informal food vendors rely on cheap, polluting plastics.

Biodegradable, germinable tableware made from maize husks.

The Product

Biodegradable, germinable tableware
made from maize husks

The Magic

Plant

Water

Germinate

Supports reforestation & soil
regeneration

The Social Impact

Currently sourced from more than 20
smallholder farmers generating extra
income

Expected to support **+100 SMEs**, **+10 event producers**, and **+2600 food vendors** with affordable
eco-packaging in the 1st year.

Call to Action:

Invest in a Sustainable Future with Agriview

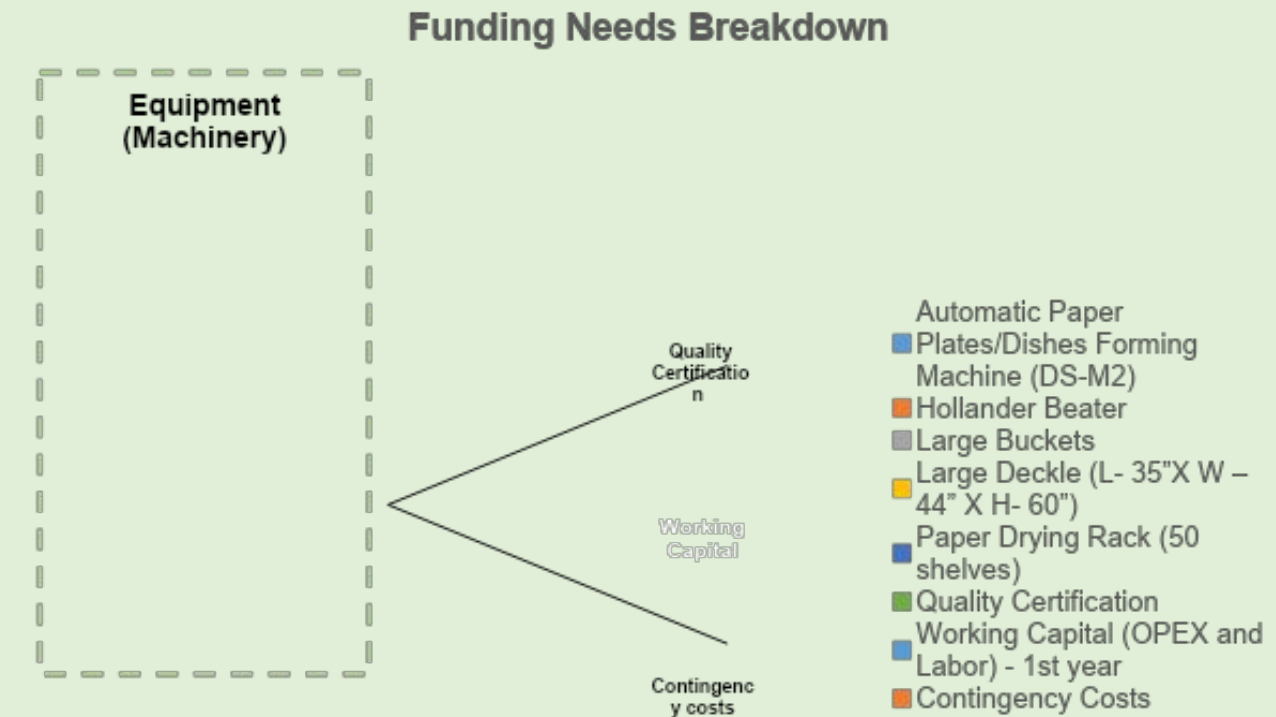

What are we looking for?

We are seeking funding to:

- Scale production with the acquisition of equipment to produce 25.000 plates per day
- Expand distribution to new provinces (Maputo, Beira, Nampula)
- Develop new product (biodegradable plastic from maize)

Beyond Capital, we also seek:

- Advisors in scaling sustainable packaging businesses.
- Support with regulatory approvals and certification for export.

Our Vision with Your Support:

To scale Agriview into Mozambique's leading sustainable tableware provider—transforming waste into opportunity, one plate at a time.

It's not just people who eat from our plates,
NATURE DOES TOO.
